

**Question 262:** In the original WBS provided, the level 2 ECES element 4.33, Disposal, was included for both the Area A and Area B tasks. In Amendment 2, this was changed for both Areas to the level 3 ECES element 4.33.06, Off-site DOE Disposal Costs, Fees, and Taxes, which is defined as: **All Phases**—Costs, fees, or taxes paid by the generator to dispose of hazardous, toxic, and/or radioactive waste at an off-site facility owned and operated by DOE. If this is the intent, what facility that is owned and operated by DOE should be used for disposal? Can offerors propose a commercial disposal facility for disposal of some wastes from the Sample Task, such as local sanitary waste facilities, or hazardous waste facilities, or the Energy Solutions facility? If so, can the solicitation be amended to include the level 3 ECES element 4.33.08, Off-Site Commercial Disposal Costs, Fees, and Taxes?

**Answer:** Section L.32, Attachment L-5 and Attachment L-6. ECES code 4.33.06 is incorrect. Per the assumption stated in Section 5.3.4 of Attachment L-3, Representative Sample Task, "LLW and MLLW are disposed at a commercial licensed radwaste disposal facility", ECES Code 4.33.08, Off-Site Commercial Disposal Costs, Fees, and Taxes should be used. The cost template will be revised.
